## CERTIFIED QUALITY

### ISO 9001/14001 Certification

### Technical Data Sheets

## 7-YEAR WARRANTY

ASSOCIATE N° 11666  
**AIDIMME**  
INSTITUTO TECNOLÓGICO

UNE EN 248, UNE EN 19703, UNE EN 817

Committed to the quality we deliver to our customers, GME DIVISIÓN BAÑOS S.L. holds certifications that guarantee the quality of all its products, which comply with current European standards and regulations.

GME DIVISIÓN BAÑOS S.L. is also a member of the AIDIMME Technological Institute, where product inspections and laboratory testing are carried out to ensure performance, reliability and proper operation across our entire product range.

All our mixer taps and thermostatic showers have undergone rigorous testing to certify their quality and compliance with applicable European regulations.

List of tests performed:

- Verification of nickel/chrome coating corrosion resistance in accordance with UNE EN 248 — salt spray (fog) test for a minimum of 200 hours.
- Jet spray distribution test in accordance with UNE EN 19703.
- Maximum flow rate test (l/min) to verify water consumption, including flow rate comparison with and without aerator. In accordance with UNE EN 817 and UNE EN 817 mixer tap performance requirements.
- Leak-tightness test in accordance with UNE EN 817, verifying reliable sealing performance and durable shut-off components.
- Mechanical pressure-resistance test in accordance with UNE EN 817, validating robust structural design for high-pressure water systems.
- Operating-control torsion-resistance test in accordance with UNE EN 817, ensuring the actuation mechanism meets technical performance specifications.

## COMMITTED TO QUALITY & ENVIRONMENTAL RESPONSIBILITY

### ISO 9001 Certification

At GME División Baños, S.L., quality and environmental responsibility are core values embedded in every stage of our work. That is why we are certified in ISO 9001 (Quality Management) and ISO 14001 (Environmental Management), endorsing not only our products but also the daily processes we carry out across our operations.

### 14001 Certification

ISO 9001 ensures efficient, transparent management and a culture of continuous improvement, guaranteeing that every decision and procedure meets the highest standards of excellence. ISO 14001 certifies our commitment to sustainability, driving responsible practices that reduce environmental impact and promote efficient use of resources.

### Eco-packaging

We design our tapware with systems and technologies that reduce environmental impact, such as flow rate limiters and cold-start opening systems, cutting water and energy consumption by up to 50% during everyday use. We are also committed to minimising plastic usage in our packaging. Over 75% of our portfolio already uses plasticfree eco-packaging, made exclusively from recyclable, low-impact materials.

Committed to the future, step by step

At IO by GME, we believe every action counts. That is why we have made a firm commitment to calculate our carbon footprint annually, reduce it progressively and offset unavoidable emissions. This initiative is part of our long-term sustainability strategy, designed to minimise the environmental impact of both our products and operational processes.

Backed by the Ministry for Ecological Transition, we continue advancing towards more responsible production, actively contributing to a more sustainable future.

GME DIVISIÓN BAÑOS S.L. — one of the top 500 companies for Business Growth in 2023

CEPYME500 is an initiative by CEPYME designed to identify, select and promote a group of 500 companies leading business growth, based on their performance and their ability to generate added value, employment, innovation and international reach.

# Who we are

**GME DIVISI3N BAÑOS, S.L.** is a Valencian family-owned company within Lorente Holding VLC, backed by more than 30 years' experience in the production and distribution of bathroom equipment.

As the undisputed leader in the Spanish shower enclosure market, GME continues to expand its portfolio with new product lines, including mixer taps and shower accessories, with the aim of simplifying installers' work and delivering fully integrated solutions for complete bathroom design and fit-out.

All of this while staying true to the original philosophy that has driven our success and market position:

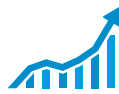

100% STOCK —  
Immediate delivery on  
25,000+ SKUs

Local, fast and  
solution-driven service

Innovation to meet  
the market's evolving  
needs

Enhanced value-for-  
money proposition

Customer-first  
commitment and  
long-term reliability

## INVERTER SYSTEM

The advantages of thermostatic control, without the drawbacks

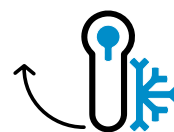

### Cold-start opening system

This simple system delivers significant energy savings, as hot water is only activated when truly needed. The boiler or water heater will not switch on until a warm shower is intentionally selected. This means that, in addition to reducing energy and running costs, your daily shower will leave a smaller carbon footprint, supporting a more sustainable bathroom routine.

### INVERTER distributor

Our INVERTER showers feature a 3-position ceramic cartridge (shower handset, overhead shower head and off), operating with thermostatic-like control but without the common issues caused by hard water, pressure imbalances or variations in supply pressure.

The cartridge allows the single-lever to remain set at your comfort temperature. You simply use the INVERTER distributor to switch between the overhead shower, the handset, or turn the water fully off at the centre. All of this is paired with a sleek, contemporary and minimalist design. The telescopic rail, height-adjustable sliding holder and the 25 cm ultra-slim shower head supplied as standard give the INVERTER system a clear competitive edge over similar products.

## NEW-TECH THERMOSTATIC SYSTEM

The exposed thermostatic showers from GME's Elite range include the following high-performance features, delivering outstanding reliability and superior performance:

- Anti-burn system to prevent abrasion when in contact with the tap body
- EcoStop system, saving up to 40% water consumption
- Self-cleaning cartridge, easy to remove, featuring the latest-generation Vernet sensor by Vernet Group
- Safety temperature lock button, ensuring precise, stable control up to a maximum of 38°C
- High-accuracy temperature limiter set to 38°C for enhanced safety

As standard, the Elite range also includes a height-adjustable holder, telescopic rail and an ultra-slim 25 cm overhead shower head.
